PROFILE SUMMARY

Process-driven and highly technical IT Professional with a strong background in systems administration, corporate endpoint deployment, and multi-zone network infrastructure. Experienced in managing Windows environments via SCCM, diagnosing hardware faults, and building secure hybrid infrastructures. Proven capability in user-facing technical support, utilizing systematic documentation and ITIL-aligned workflows. Bilingual (English/Spanish), holding a valid driver's license, and actively expanding technical proficiency in cloud environments and Microsoft 365 technologies.

TECHNICAL SKILLS

- **IT Support & Endpoint Management:** Microsoft Endpoint Configuration Manager (SCCM), PXE Boot OS Deployments, OS Upgrades, PC Assembly & Hardware Diagnostics.
- **Cloud & Identity Systems:** Active Directory (AD), Microsoft Entra ID / Azure AD (Core Concepts), Group Policy Objects (GPOs), User & Role-Based Access Control (RBAC).
- **Ticketing & Process Workflows:** Hands-on practice with ticketing systems (Jira/ServiceNow concepts) and incident resolution frameworks under strict SLA/ITIL structures.
- **Networking & Security:** Inter-VLAN Routing (HP 1920 / Cisco), WLAN Segmentation, OPNsense Firewalls, DHCP/DNS server configurations, Network Topology Design.
- **Virtualization & Automation:** Proxmox VE (ZFS infrastructure), VMware ESXi, Hyper-V, PowerShell Scripting for automated directory account creation.

TECHNICAL PROJECTS

Enterprise Network & Endpoint Deployment Infrastructure (DEPO.local) | Spring 2026

- Engineered a multi-zone network featuring an HP 1920 Layer 3 Switch isolating Server (VLAN 100), Wireless (VLAN 200), and Management (VLAN 50) infrastructures.
- Deployed a Proxmox VE hypervisor host on a Dell PowerEdge R320 utilizing ZFS storage and a Dual-Homed Routing Model to segregate management traffic from public updates.
- Configured Windows Server 2025 Active Directory Domain Services, automating user creation via PowerShell and implementing granular cross-department hidden file shares.
- Architected an SCCM infrastructure, resolving complex SQL Server prerequisites and optimizing application deployment by structuring localized standalone package paths.
- Secured endpoints by applying strict GPOs (e.g., local administrative login restrictions, browser homepage enforcements) and writing custom PowerShell registry scripts.

Enterprise Hybrid Infrastructure (Capstone Project - DKWO) | Spring 2026

- Designed a multi-server environment on VMware ESXi hosting Windows Server 2025 Domain Controllers.
- Configured secure gateway with segmented VLANs and RADIUS authentication.
- Integrated Nextcloud and IIS services with Active Directory for centralized access control.

Linux Vulnerability Assessment & Security Audit | Fall 2024

- Conducted a comprehensive security audit on legacy Ubuntu systems using Nmap for port scanning.
- Identified critical exploits (e.g., Telnet default credentials) and documented remediation strategies.
- Implemented system hardening by enforcing SSH key authentication and disabling insecure services.

EDUCATION

Diploma in IT Systems Management & Networking

Nova Scotia Community College (NSCC) - Truro Campus | Sept 2024 – May 2026 (Completed)

EMPLOYMENT EXPERIENCE

IT Field Experience Placement | Chignecto-Central Regional Centre for Education | May 2026 – June 2026

- Executed system-wide hardware, firmware, and custom operating system image deployments across corporate networks using SCCM.
- Troubleshoot and resolved complex client-side software dependencies, Windows OS corruption, and network connectivity faults within strict time constraints.
- Maintained absolute system documentation integrity for all ongoing technical configurations and hardware lifecycle movements following ITIL guidelines.

Warehouse Selector | Sobeys Distribution Centre - Debert, NS | May 2025 – Present

- Effectively utilize Voice-Directed Picking technology to assemble complex orders with high precision under strict productivity targets.

Meat Clerk | Atlantic Superstore - Truro, NS | Sept 2024 – May 2025

- Resolved client inquiries and maintained strict protocols, demonstrating strong communication skills in high-pressure situations.

Printer Operator & Maintenance Technician | El Norte Newspaper - Ecuador | Jan 2022 – Jul 2023

- Operated and maintained large-scale industrial printing equipment for daily production.
- Performed routine mechanical and software troubleshooting to minimize downtime and ensure 24/7 operation.
- Diagnosed hardware faults and executed repairs following technical documentation.

VOLUNTEER EXPERIENCE

International Student Ambassador | NSCC - Truro Campus

- Guide international students in adapting to campus life, demonstrating leadership and interpersonal skills.

Volunteer Member | Enactus NSCC

- Support social entrepreneurship projects by assisting with product logistics and quality control.
