To Whom It May Concern,

I am writing to express my strong interest in joining your technical team. Having recently completed my Diploma in IT Systems Management and Networking at Nova Scotia Community College (NSCC), I have developed a robust foundation in infrastructure management, user support, and secure network deployments. My approach combines technical rigor with a proactive mindset focused on maintaining operational efficiency.

Throughout my academic career, I have successfully led complex infrastructure projects. Most notably, my Capstone Project (DKWO) involved designing a virtualized enterprise environment on VMware ESXi with Windows Server 2025 Domain Controllers and UniFi-managed network segmentation. Additionally, I established a functional Hybrid Cloud environment by deploying a Site-to-Site VPN between on-premises resources and Microsoft Azure, demonstrating my ability to navigate modern cloud integration challenges.

My hands-on experience extends to my work placement at the Chignecto-Central Regional Centre for Education (CCRCE), where I managed hardware lifecycle deployments and resolved critical software conflicts. Furthermore, my background at Sobeys and El Norte Newspaper has honed my ability to perform under pressure and maintain high productivity targets. As a bilingual professional (English/Spanish) and a former International Student Ambassador at NSCC, I pride myself on my communication skills and my ability to guide diverse users through technical challenges.

I am eager to bring my troubleshooting expertise, my experience with ticketing systems in my dedicated home lab, and my passion for system automation to your organization. Thank you for your time and consideration. I look forward to the possibility of discussing how my skills can contribute to the continued success of your IT team.

Sincerely,

Oscar Matias Castro Garrido
