PROFILE SUMMARY

Passionate IT professional with a hands-on approach to technical support and systems administration. Experienced in deploying secure Windows environments, hardware diagnostics, and user-facing troubleshooting. Dedicated to efficiency and continuous learning in hybrid and cloud-virtualized infrastructures. Bilingual (English/Spanish) with strong communication skills, seeking a Help Desk / Support role to apply technical expertise in resolving complex user issues.

TECHNICAL SKILLS

- **IT Support & Troubleshooting:** PC Assembly/Diagnostics, Remote Desktop Protocol (RDP), Hardware Maintenance, User Account Management.
- **Ticketing & Workflow:** Practice with **Ticketing Systems** (Jira/ServiceNow concepts) and ITIL workflow standards for incident management in a dedicated Home Lab environment.
- **Systems Administration:** Windows Server 2019/2022/2025, Active Directory (AD), Group Policy (GPO), PowerShell Scripting, Linux (Ubuntu/CLI).
- **Networking:** Cisco Routing & Switching (VLANs), Ubiquiti UniFi (WLAN Segmentation), TCP/IP, DNS, DHCP, OPNsense Firewall configuration.
- **Virtualization & Security:** VMware ESXi, Hyper-V, Vulnerability Assessment (Nmap), SSH Hardening, Access Control (RBAC).

ACADEMIC PROJECTS

Enterprise Hybrid Infrastructure (Capstone Project - DKWO) | Spring 2026

- Designed a multi-server environment on VMware ESXi hosting Windows Server 2025 Domain Controllers.
- Configured UniFi Gateway Ultra with segmented VLANs and RADIUS authentication.
- Integrated Nextcloud and IIS services with Active Directory for centralized access control.

Small Office Network Infrastructure & Automation | Fall 2024

- Designed a fault-tolerant Windows Server ecosystem featuring a Primary and Backup Domain Controller.
- Automated user account creation and Organizational Unit (OU) management using PowerShell scripts.
- Secured network perimeter using OPNsense, implementing strict firewall rules and traffic monitoring.

Linux Vulnerability Assessment & Security Audit | Fall 2024

- Conducted a comprehensive security audit on legacy Ubuntu systems using Nmap for port scanning.
- Identified critical exploits (e.g., Telnet default credentials) and documented remediation strategies.
- Implemented system hardening by enforcing SSH key authentication and disabling insecure services.

EDUCATION

Diploma in IT Systems Management & Networking

Nova Scotia Community College (NSCC) - Truro Campus | Sept 2024 – May 2026 (Completed)

EMPLOYMENT EXPERIENCE

IT Work Placement (5 weeks) | Chignecto-Central Regional Centre for Education | May 2026 - June 2026

- Install and configure hardware, firmware, software and peripherals.
- Install software upgrades including operating systems and applications.

- Identify and repair hardware and software problems.

Warehouse Selector | *Sobeys Distribution Centre - Debert, NS* | May 2025 – Present

- Effectively utilize Voice-Directed Picking technology to assemble complex orders with high precision under strict productivity targets.

Meat Clerk | *Atlantic Superstore - Truro, NS* | Sept 2024 – May 2025

- Resolved client inquiries and maintained strict protocols, demonstrating strong communication skills in high-pressure situations.

VOLUNTEER EXPERIENCE

International Student Ambassador | *NSCC - Truro Campus*

- Guide international students in adapting to campus life, demonstrating leadership and interpersonal skills.

Volunteer Member | *Enactus NSCC*

- Support social entrepreneurship projects by assisting with product logistics and quality control.
